ERUPT!

STEP 1. CUT

Cut the top and bottom off the plastic bottle.
Note: Adult assistance required for this step!

STEP 2. STICK

Use Clag Kids PVA Glue to stick the plastic bottle to the centre of the cardboard. Make sure the plastic bottle is upright.

STEP 3. SHRED

Shred the newspaper into long strips.

STEP 4. PAPIER-MÂCHÉ

To begin building the volcano, scrunch strips of paper into balls, apply Clag Paste and stick them around the base of the bottle. Repeat this step, working your way around and up the bottle to form a base for the papier-mâché.

PROJECT SHEET

WATCH IT ERUPT!

STEP 5. FINISH THE BASE

Apply glue to a strip of paper and lay it onto the crumpled up paper, from the top of the bottle to the bottom. Continue this process until the entire volcano is covered. Repeat step 5 twice - you'll need at least three layers of paper! Leave the volcano to dry for 48 hours.

STEP 6. PAINT

Paint the volcano.

STEP 7. DECORATE

Decorate the volcano with dinosaurs.

STEP 8. ERUPT!

Make Your Volcano Erupt. Take your volcano outside - this could get messy! Pour baking soda into the top of the volcano. Add the red food colouring to the white vinegar, tip it into the volcano, and watch it erupt!
